

The COLOUR UPLOADER

with
**TANYA &
THOMPSON**

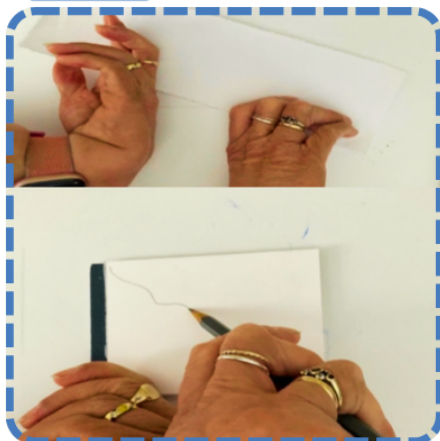

STEP 1

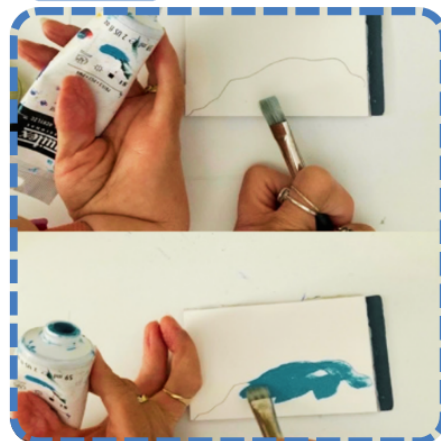

Choosing your materials to paint, make art on. You will need paper, card or canvas to make your artwork. Use the materials that are familiar to you or choose something new to work with. For example paint, coloured pens, pastels etc

STEP 2

Divide your paper into 2 sections. You can do this by folding your paper or drawing a line in a different direction to create two separate sections. Section 1 should be small, Section 2, should be big.

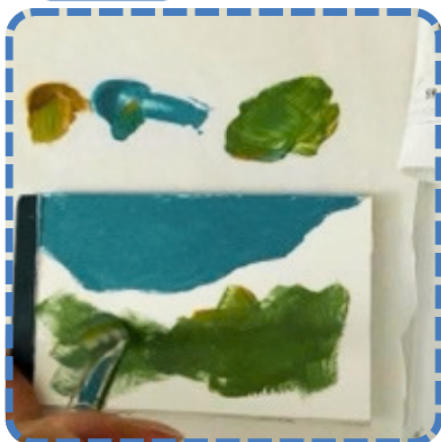

STEP 3

Choosing a new colour.

This must be a colour you don't use very often or is new to you. Try painting your new colour in the smallest section, Section 1

STEP 4

Blending your colour.

Try blending your new colour with one of your favourite colours. Paint this colour in the big section, Section 2

STEP 5

Reflect on your colour.

Spend some time looking at the new colour you have created. Try adding one other colour from your palette to your new colour. This colour should pop out.

STEP 6

Use your new colour

in an artwork and share it and other colour experiments with Syncing Space
